The application and the required annexes must be presented by the final deadline of 20 days from the day after publication of the present call on the Official Register of the University (link: www.units.it/ateneo/albo/) and on the University website (link: Concorsi, selezioni e consulenze/Competitive Examinations, Selections and Consultancy Contracts), using the dedicated, web-based application at <https://pica.cineca.it/units/>

Applications and the necessary documentation cannot be submitted in any other way.

The online application obviously requires candidates to have an email address in order to register with the system. Candidates should insert all the data required and produce the application and attach the necessary documents in pdf format.

All sections of the application must be completed as indicated in the online procedure. A copy of an ID document must also be attached (candidates who fail to do so will be excluded) together with receipt of payment of the application fee (as indicated below).

Up to the deadline for submission, the system will save a draft application that can be subsequently completed and submitted. If necessary, and up to the deadline for submission, an application can be withdrawn and a new one submitted.

The system certifies the submission date of the online application to participate in the selection procedure by automatically sending a receipt to the email address given by the candidate. Each application will be given an identification number, which together with the code of the selection call given on the application should be used in any subsequent correspondence.

The online application must be completed and submitted by 23.59 on the day of the deadline. After this time, the system will block access to and submission of the online application.

The service may be temporarily interrupted for technical reasons.

The online application must be finalised and concluded as follows:

- by applying a digital signature with a smart card, a USB token or remote signature that allow the user to sign general documents with signature software installed on a PC or via a web-portal for remote signatures provided by the certifier. Law 241/1990 – Person responsible for the administrative procedure: Dr. Valentina Celli

compatibility with the digital signature system on the server. If the check is successful, the application can be signed directly on the server (e.g. ConFirma).

- candidates who do not have compatible digital signature devices and holders of Remote Digital Signatures who have access to a portal to sign generic documents must save the PDF file generated by the system on their PCs and without making any changes sign it digitally in CAdES format. This will generate a file with a .p7m extension, which must be loaded back into the system. Any change made to the file prior to the application of the digital signature will prevent automatic checking that this document corresponds to the original and will result in the candidate being excluded from the selection procedure.
- If none of the above options can be used, the candidate should save the PDF generated by the system on his/her PC, and without making any changes, print the file, sign it on the last page. This document should then be scanned to a PDF file and re-loaded onto the system. If this document, duly signed, is missing, the candidate will be excluded from the selection procedure.

1. their full name and Italian Tax Identification Number (Codice Fiscale);
