4	Microsoft Word: finalità dell'operazione taglia e incolla
5	Microsoft Word: formattazione della pagina
6	Microsoft Excel: creare un grafico
7	Microsoft PowerPoint: cambiare lo sfondo

UNIVERSITÀ
DEGLI STUDI
DI TRIESTE

About us

Study in Trieste

1 Your choice of university is crucially important for your future and is therefore an extremely significant personal investment that should be carefully considered in order to obtain an academic qualification that guarantees real value for your professional career.

The principal ambition of the University of Trieste is to prepare the future class of leaders and professionals for a world of work in which the required level of knowledge and preparation changes every day. Adaptability to change and continual learning are among the main values that we emphasise. For many years, the University has held a leading position in the ranking of Italian universities, while it is one of the few Italian institutions also found in international rankings. Recently, UniTS received the highest assessment of 'very positive' on the MIUR (Ministry of Education, Universities and Research) scale, placing the University in Band A.

2 We invest extensively in programmes that offer students international opportunities through agreements with other European and world universities that can provide high quality education and rich personal development.

3 The range of first and second level degrees, together with the PhD and specialisation courses, as well as the excellent staff-student ratio that ensures students can actively participate in their learning, guaranteeing access to internships, laboratories, libraries and study facilities, are all key strengths that distinguish the University of Trieste from other top institutions.

The exceptional beauty of the city of Trieste offers a lively environment which has flourished once again in recent years with renewed interest in Research, Culture and Science. The city was chosen to host ESOF 2020, the most important European occasion focusing on the debate within science, technology, society and politics. The quality of life is enviable; there are a multitude of student events, and a great variety of sports and cultural activities with prestigious theatres and high-profile artistic occasions.

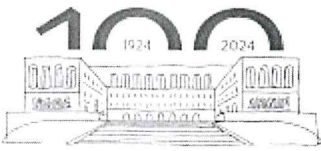

It will be a great pleasure to welcome you to our University and support you through your personal development, always ready to embrace any suggestion or stimulus to improve.

Mission & Vision

MISSION

"The University of Trieste is a lay, pluralistic, public sector institution of higher education that is independent of any ideological, religious, political or economic orientation, in compliance with the principles of the Constitution of the Italian Republic and the international commitments Italy has undertaken in the fields of scientific research and university education.

4 The main objectives of the University are scientific research and higher education, in order to promote the cultural, civil, social and economic development in the Italian Republic. The University acknowledges that teaching and research are inseparable and that both, where envisaged, are inseparable from support services." (Art. 1 of the Statute)

VISION

SHARING TO CHANGE AND GROW

5 UniTs develops in a particularly stimulating territorial environment: it can count on a **stable connection with the city and regional system**, ranging from relations with the region's universities and research institutions to assistance activities.

6 The lively city context and the **geostrategic** location in **Central Europe** allow it to play a hinge role at the continental level, to gain international acknowledgement for the quality of its **teaching** and achieve significant **research** results with excellence in all fields.

7 Precisely because of this peculiarity it intends to be and appear an **open, stimulating, innovative environment**, able to provide a space for growth and development of students, teachers, researches, technical and administrative staff.

With this wide-ranging goal UniTs aims to grow as a global and harmonic community focusing on involvement of the entire academic and civic community, on the respect and enhancement of the different inclinations, on the development of a policy of responsibility, on the growth and enhancement of skills and internal projects, on a culture of project and result, spread at all levels.

- UniTs intends to get closer to the primary concept of Universitas, aims to regain possession of the institutional missions that the same Constitutional Charter consecrates, putting the **student community** and the **practise of critical knowledge** at the center of attention;
- UniTs intends to become a promoter of the recovery of **responsible autonomy**;
- UniTs intends to give new life to **institutional relations** at city, regional and national level in order to regain new centrality in the framework of institutional relations, in a perspective of **active participation in the choices** that involve the academic world;
- UniTs aims to be a driving force and act by defining **strategies, synergies, new paths and new professionalism**;
- UniTs, through the **integration of ideas and people**, aims to develop a reality of **university city**, that is not only part of the territory, but itself becomes the territory.
